RAPID “Type-Ahead” The Catch

- **This is an all or nothing setting.**
- Once set, it can be unset, but while set there will be no type-ahead anywhere in FMS production.
- Where you might find “type-ahead” useful is when you start to type in a field that has “drop-down” choices and the “type-ahead” feature picks your choice.
- If type-ahead is turned off, this will no longer happen and you’ll have to hit the spyglass to search for your selection.
