

OSPIP Process Meeting – Web Updates

Presented by:
Office of Sponsor Projects & Industry Partnerships (OSPIP)

May, 15 2013

eSRA Validation Information

Information on the various 'validation' messages is now available.

eSRA News and Schedules

eSRA is the new enterprise system being developed for electronic submittal and tracking of proposals as well as non-financial award management. When fully developed, it will replace RAPID for managing sponsored research proposals at LBNL. It will provide many features not available in existing systems. The development team of OSPIP, BSA, IT, and the Huron Consulting Group is working to provide a time-saving and easy to use system that also ensures compliance with all applicable policies and procedures.

Contact eSRAHelp@lbl.gov for more information or to schedule training.

eSRA News Updates

All Grants.gov proposals should now go through eSRA.
