To Whom It May Concern:

Subject: Completion of Reps and Certs

The Lawrence Berkeley National Laboratory (LBNL) is a Department of Energy (DOE) National Laboratory, operated by the Regents of the University (Regents) under contract DE-AC02-05CH11231 (Prime Contract). This Management and Operating (M&O) contract is entered into under the authority of FAR 17.6 which prescribes the policies and procedures for M&O contracts for the DOE.

The Regents completed all the required Representations and Certifications (Reps and Certs) for this contract when the contract was awarded in 2005.

The Prime Contract contains all the required socio-economic clauses and compliance with these clauses are monitored by the DOE. LBNL is a dedicated DOE contractor and is precluded from entering into any other U.S. government contracts or doing any independent commercial work. All work must be approved, authorized, and funded through its contact with DOE.

DOE allows non DOE sponsors to access the unique capabilities of LBNL in accordance with FAR 35.017 and the regulations of DOE. Access to LBNL is under the Work for Others Program. DOE considers these agreements to be sales agreements and not procurements under another Government prime award. As such, DOE does not believe that LBNL should be required to complete independent Reps and Certs.

If you have any question, feel free to contact me at (510) 486-6626.

Sincerely,

A handwritten signature in blue ink that reads "Spencer R. Peterson".

Spencer R. Peterson
