

## Sample Publication Acknowledgement Language from DOD:

### 5. PUBLICATION AND ACKNOWLEDGMENT (NOV 2000) (USAMRAA)

a. **Publication.** The recipient is encouraged to publish results of the research, unless classified, in appropriate journals. One copy of each paper planned for publication shall be submitted to the technical representative simultaneously with its submission for publication. Copies of all publications resulting from the research shall be forwarded to the Grants Officer as they become available, even though publication may in fact occur subsequent to the termination date of this award.

b. **Acknowledgment.** The recipient agrees that in the release of information relating to this award such release shall include statements to the effect that the project or effort depicted was sponsored by the Department of the Army and shall include:

(i) The Award Number;

(ii) "The U.S. Army Medical Research Acquisition Activity, 820 Chandler Street, Fort Detrick MD 21702-5014 is the awarding and administering acquisition office." and;

(iii) A statement that the content of the information does not necessarily reflect the position or the policy of the Government, and no official endorsement should be inferred. For purposes of this article, information includes news releases, articles, manuscripts, brochures, advertisements, still and motion pictures, speeches, trade association proceedings, etc.

c. Prior to release to the public, the recipient shall notify the Grants Officer and the Grants Officer's Representative (GOR) of the following: planned news releases, planned publicity, advertising material concerning grant/cooperative agreement work, and planned presentations to scientific meetings. This provision is not intended to restrict dissemination of research information; the purpose is to inform the U.S. Army Medical Research and Materiel Command (USAMRMC) of planned public release of information on USAMRMC-funded research, in order to adequately respond to inquiries and to be alert to the possibility of inadvertent release of information which could be taken out of context.

d. If the research involves the use of laboratory animals, the recipient must include the following statement in any publication resulting from the research: "Research was conducted in compliance with the Animal Welfare Act Regulations and other Federal statutes relating to animals and experiments involving animals and adheres to the principles set forth in the Guide for Care and Use of Laboratory Animals, National Research Council, 1996."
