

8. Did the Participant require any substantive/material changes to the laboratory-/field-approved modular CRADA and/or any changes to double underlined language? **{SPO to Provide}**
(X) Yes () No
If yes, either attach copies of the proposed modified articles or identify the Article paragraphs modified when the CRADA is submitted concurrently with this JWS:

Copy of Laboratory Modular CRADA which changes identified is attached.

This includes indicating or attaching the Participant's U.S. Competitiveness worksheet/justification. If requested by the Contracting Officer, the Laboratory will provide justification for modified articles in writing.

9. **Additional Notes: {SPO to Provide}** If applicable, identify special considerations or comments.

The Laboratory has reviewed the information on the U.S. Trade representative web site, specifically the Inventory of Foreign Trade Barriers and the Special 301 Report and created a Memorandum to the CRADA file, attached, which concludes that we did not find any information to indicate that there are any policies in place in Japan that prohibit cooperative research and development agreements or license agreements with United States entities nor was there any indication that the Japanese government did not enforce U.S. intellectual property laws.

Laboratory Approval:

Jeffrey S. Weiner, Manager *Date*
Sponsored Projects Office
