# Supervisor Responsibilities for Student Safety

---

- Be a good safety role model.
- Review the scope of work/project with the students.
- Review all steps of experiments that students will perform to ensure they understand safety hazards and precautions.
- Guide students through the Job Hazards Questionnaire (JHQ).
- Review the JHQ training profile and assist with training enrollment.
- Orient students to lab/operations practices, attire, procedures, equipment, PPE, and lab personnel (including trainers).

- Define what the student can and cannot do, with and without training.
- Provide line-of-sight supervision when training is not complete.
- Introduce students to Division Safety Coordinators (DSCs), Building Managers, and others who have safety roles.
