Machine Guarding

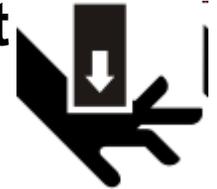

It's Not Just For Shops Anymore

Machine guarding is required for ANY machine that exposes a person to injury including cuts, punctures, pinches, crushes, and entanglement.

Research equipment that needs guarding includes (but is not limited to):

- Robots (samplers, stackers)
- Belt Drives (including conveyors)
- Material Presses, Tensile Testers, Cutters
- Certain High Pressure Outlets
- Furnaces (exposed surfaces $\geq 60^{\circ}$ C)
