

Motorist Safety

in Construction Zones

- If possible, select an alternate route
 - Obey signs when before entering the construction zone
 - Maintain a safe following distance (truck cannot “stop on a dime”)
 - Remain alert
 - Watch for construction equipment and workers
-
- Do not overtake slow construction vehicles
 - Watch for impatient motorists
 - Remember: If you cannot see the driver’s side view mirror, you are in a blind spot, the trucker cannot see you!
