Job Hazards Analysis (JHA)

How do I know that I'm doing my job safely?

The Job Hazards Analysis (JHA) process provides a work hazard and control description (called the Hazards Profile) and a Work Authorization.

The Work Authorization contains the following elements:

- **A Description of the Work** being analyzed
- **The Tasks** incorporated into that Work
- **The Hazards** associated with those tasks
- **The Controls** required to mitigate those hazards

The online JHA can be accessed at

<https://ehswprod.lbl.gov/ehstraining/jha/login.aspx>

For additional information contact the JHA Team at JHA@lbl.gov.
