science at the theater

free! **MONDAY, MAY 12, 2008**
5:30 – 7:00 PM

Berkeley Repertory Theatre
Roda Theater | 2015 Addison Street
Berkeley, California

**SPONSORED BY BERKELEY LAB
FRIENDS OF SCIENCE**

Co-sponsored by the University of California at Berkeley,
Chabot Space & Science Center, The Exploratorium,
Lawrence Hall of Science, Osher Lifelong Learning
Institute@Berkeley, and the Science Departments of
Albany, Berkeley, and Oakland High Schools

NATE LEWIS

George L. Argyros Professor of Chemistry, California
Institute of Technology / Beckman Institute Molecular
Materials Resource Center, Principal Investigator,
CalTech / LBNL Solar Energy Research Center Scientist

THE HELIOS TALKS 

Capturing Solar Energy for Transportation Fuel

Dr. Nate Lewis' talk will look at the challenge of capturing solar energy and storing it as an affordable transportation fuel — all on a scale necessary to reduce global warming.

Overcoming this challenge will require developing new materials that can use abundant and inexpensive elements rather than costly and rare materials.

Please join us to learn more about the promise of new materials in the development of carbon-free alternatives to fossil fuel.

No reservations or tickets are required.
