

**LBL 0010 Overview of Integrated Safety Management (ISM)
Course Syllabus**

Subject Category: General ISM Awareness Training
Course Length: 40 minutes
Delivery Mode: Online

Course Prerequisite: None
Medical Approval: None

Course Purpose: The purpose of this course is to provide an overview of how the Lab uses Integrated Safety Management (ISM) to plan and perform safe work. **This course** shows how ISM is applied in different contexts and highlights your role and participation in this process.

Audience:

This training is for workers hired March 1st, 2016 or after.

Learning Objectives:

On completion of this training participants will be able to:

- Use the five step ISM process as a framework for helping think through the safety of the work you will perform.
- Understand how changes to your scope of work can potentially change the hazards of that work and what to do in these situations.
- Access ISM and other safety resources available at Berkeley Lab.

Training Compliance Requirements: LBNL's ISM Plan 6.2.3.1

Written Exam: No. Quiz questions are part of the training

Practical Exam: No

Retraining/Recertification: No

Course Evaluation: Written evaluations regarding the effectiveness of the trainer, the training, and the visual aids.
