

Got Pipettes?

Help improve laboratory ergonomics by participating in an evaluation of popular pipettes!

The ergonomics group at LBNL is seeking participants for a study of pipette user preferences. Participants will be asked to perform simple pipetting tasks with 10-12 different pipette models. For each person, the entire study will take 1 hour to complete. Participants must be at least 18 years of age, must have 60 hours or more experience pipetting, have no recent/recurring discomfort in the upper extremities, and be LBNL employees or others with LBNL badges. If you want to participate during paid work time, you should obtain the permission of your supervisor. Otherwise, you may participate during your lunch hour.

Contact Monica Lichty at mglichty@lbl.gov, (510) 486-6167 or Ira Janowitz at iljanowitz@lbl.gov to participate.
